DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, entirely, and claim 9, in part, drawn to nucleic acids, vectors, and host cells. Claim 9 is included in this group insofar as it encompasses plant host cells.

Group II, claim(s) 10-11, drawn to proteins.

Group III, claim(s) 12-13, drawn to methods for producing and harvesting proteins.

Group IV, claim(s) 14, drawn to methods for synthesizing aurones.

Group V, claim(s) 15, drawn to methods for transforming plants.

Group VI, claim(s) 9, in part, and claims 16-17, drawn to transgenic plants. Claim 9 is included in this group insofar as it comprises entire transgenic plants.

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The first claim does not provide a special technical feature that is distinguished over the prior art because Hunt *et al.* (Plant molecular biology: an International Journal on Molecular Biology, Biochemistry and Genetic Engineering, Jan 1993. Vol. 21, No. 1, pages 59-68) disclose the a gene encoding a polyphenol oxidase (PPO) from potato (Figure 1). The instant specification teaches polyphenol oxidase genes are encode proteins having activity to synthesize

aurones by using chalcones as substrate (see specification, page 8, lines 15-24). Therefore, the instant invention lacks Unity of Invention and the above inventions are properly separated from one another.

3. A telephone call was made to Ron Grudziecki on 8/30/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
